nickojek2x@gmail.com

I am a skilled web developer with expertise in Laravel, React, and dynamic UI development using React, TailwindCSS and Inertia.js and I have strong focus on backend development. Seeking opportunities to contribute to a professional environment through effective teamwork, problem solving, and clear communication. Passionate about coding with a solid foundation in programming concepts. Eager to contribute to successful outcomes and further develop skills in a dynamic environment.

Projects

5th Avenue Grill and Restobar - November, 2024

- Implemented an attractive, well-organized digital menu that allows customers to easily browse detailed descriptions and images of each dish.
- Developed a user-friendly ordering system that enables effortless item selection, customization, and seamless cart management.
- Integrated payment to ensure that all online transactions are secure and reliable.
- Implemented that provides customers with updates on their order status from confirmation to serving.
- Built the platform using Laravel and modern web technologies to ensure it adapts seamlessly across devices and scales efficiently as the user base grows

Mango Drive - October, 2024

- Implemented an intuitive interface that allows customers to quickly browse a dynamic menu, select items, and place orders with minimal hassle.
- Integrated PayPal for secure and convenient payment processing, ensuring that customer transactions are handled safely.
- Developed a system that keeps users informed with updates from order placement to confirmation.
- Built Mango Drive on Laravel, ensuring a smooth and responsive experience on desktops, tablets, and smartphones.
- Enabled flexible order customization, allowing customers to tailor their selections to meet their personal tastes and dietary requirements.

Pagadian Careers - August, 2024

- Implemented an advanced search and filtering system that enables job seekers to browse through a comprehensive collection of job postings based on category, location, and job type.
- Developed a dedicated dashboard for employers, allowing them to create, update, and manage job postings efficiently.
- Implemented a seamless application workflow that enables candidates to easily apply for positions, upload resumes, and track their application status.
- Built detailed profile management features that allow both job seekers and employers to showcase skills, experiences, and company culture effectively.
- Ensured the platform was developed with robust security practices and scalable architecture to protect data and accommodate growth in user activity and job listings.

Water Billing - April, 2024

- Implemented automated billing functionality that calculates water consumption and generates bills, significantly reducing manual errors.
- Developed features to continuously monitor water usage, providing data to both administrators and customers for improved accountability.
- Integrated robust payment processing capabilities to ensure safe and efficient handling of all transactions.
- Created an intuitive dashboard that allows administrators to easily manage customer accounts and billing history, while customers can conveniently access their usage and payment records.
- Engineered the system using Laravel, ensuring that it scales efficiently to meet growing demand while maintaining consistent performance and reliability.
